

A Donaldson Company

A WORLD LEADER IN FUME
EXTRACTION TECHNOLOGY

TVT 2

ELECTRONICS

Last Updated on 16.07.2018

Dual tip extraction for all solder applications.

The TVT 2 high vacuum unit is designed to extract and filter fumes and debris through small bore hoses and attachments. Ideally suited for soldering iron tip extraction, vac pens and any application requiring close proximity, micro extraction.

The light weight and portable TVT2 unit only requires 6 bar of compressed air to operate. This venturi system is capable of extracting fume from 2 operations.
